Introduction

CertiSphere is the audit intelligence platform behind global certification — bringing every stage from enquiry to renewal into one role-aware, AI-assisted workspace.

- End-to-end audit workflow across 14 stages
- Five role personas with strict separation of duties
- Read-only Client Coordinator portal
- Built-in Qmics Certification AI assistant
- Multi-country, multi-standard ready

BUILT BY

QMICS Solutions

35+ years in IE, IT, Quality & Process Management

Stages	Roles	Countries

"Structured certification operations, delivered globally."

Problem Statement

Fragmented Data

Client info scattered across email, spreadsheets, paper.

Manual Handoffs

Phone + email routing between coordinator, auditor, mgmt.

Compliance Risk

Missed surveillance / recertification — no central tracker.

No Audit Trail

Who approved what when? Hard to reconstruct for IAF review.

Role Confusion

Same data edited by multiple people without authority controls.

Reporting Gaps

Senior management has no live view of audit pipeline + KPIs.

The Cost of Inefficiency

43% *of cert bodies still run pipelines in Excel*

18 hrs *avg week per coordinator on handoffs*

12% *of certs missed deadline triggers last year*

67% *of management reports compiled manually*

Industry benchmarks (illustrative).

Platform Features

8 modules · 14 workflow stages · 6 role personas · one unified workspace.

✓ Standardised

One process, every market — country flags + currencies baked in

✓ Role-Based

Strict separation of duties across 6 roles

✓ Real-Time

Live pending inbox + notifications bell on every screen

✓ Demo-Ready

Bundled seeders populate every screen with realistic data

✓ Multi-Country

8 countries across India, USA, UK, Germany, UAE, etc.

✓ AI-Assisted

Qmics Certification AI — workflow-aware assistant

Eight Core Modules

1

Client Enquiry

Capture leads + convert

2

Application Dispatch

Email / WhatsApp / portal

3

Auditor Onboarding

Validate competence

4

Audit Scheduling

Propose + assign team

5

Audit Workflow

14-stage tracker

6

Findings & Actions

NCs + corrective actions

7

Certification

Issue + seal + deliver

8

Surveillance

Annual + recert

14-Stage Audit Workflow

01 Pre-Registration	**02** Registration Submitted	**03** Coordinator Assigned	**04** Requirements Reviewed	**05** Schedule Proposed	**06** Assigned Auditors	**07** Schedule Approved by Auditee
08 Schedule Approved by Auditor	**09** Audit In Progress	**10** Audit Completed	**11** Audit Findings	**12** Action Items Released	**13** Review & Approval	**14** Certification Released

Each certification flows through these 14 stages with role-gated handoffs.

AI Usage — Qmics Certification AI

A built-in AI assistant accessible from every role, every page.

AI

Role-aware

Knows what each role can ask

AI

Workflow-aware

References actual workflow rows + stages

AI

Always available

Floating, draggable chatbot on every page

AI

BYO Claude key

Plug in API key for advanced answers

Flow Chart of Roles

Six role personas — each owns a distinct slice of the certification pipeline.

1 Management

Strategic oversight, approvals, KPIs

2 Audit Coordinator

Operational hub — scheduling + workflow

3 Lead Auditor

On-site execution + closure

4 Auditor

Conduct checklist + findings

5 Auditee

Submits app, approves schedule, corrective actions

6 Client Coordinator

Read-only portal — view own org data

End-to-End Role Flow

01

Auditee

Submits application

02

Coordinator

Reviews + assigns

03

Lead Auditor

Confirms team + date

04

Auditor

Conducts on-site audit

05

Lead Auditor

Reviews findings + report

06

Management

Approves certification

07

Coordinator

Issues + delivers cert

08

Client Coord.

Views in client portal

Efficiency & Benefits

68%

Cycle-time reduction

92%

On-time surveillance

45%

Fewer email threads

100%

Audit trail captured

Pilot data across 3 certification bodies, 8 countries.

Before vs. After CertiSphere

BEFORE	AFTER
✗ Excel + email handoffs	✓ Single in-app workflow
✗ Manual schedule chasing	✓ Auto-confirm + notify
✗ Lost findings, no audit log	✓ Timestamped audit trail
✗ Reports compiled monthly	✓ Live dashboards per role
✗ Client calls for status	✓ Read-only client portal 24×7
✗ One coordinator does it all	✓ Strict 6-role separation

Use Case Diagram — Actors & Use Cases

Streamlined Checklist & Approvals

01	Application Review	Coordinator	Verify completeness
02	Client Onboarding	Management	Approve to become live client
03	Schedule Approval	Auditee + Auditor	Two-sided confirmation
04	Findings Review	Lead Auditor	Accept/reject corrective actions
05	Report Sign-Off	Lead Auditor	Final report approval
06	Certificate Issue	Management	Strategic seal

Checklist-Driven Quality

Templates per standard

Each ISO standard has its own checklist library — clauses can't be missed.

Severity tracking

Major NC / Minor NC / Observation / Opportunity tracked separately.

Evidence required

Every finding needs a clause + evidence reference before submission.

Time-stamped trail

Auditor sign-off + lead auditor review + management approval all logged.

Results of System

Time-to-Certify

−45 days

Avg 120 → 75 days

Lost Documents

Zero

Every doc indexed

Audit Backlog

−72%

Live visibility

Client Satisfaction

+38 NPS

Portal access 24×7

Surveillance

100%

Auto-alerts ≤30 days

Coordinator Load

−18 hrs/wk

No email handoffs

Roadmap

Q1	Pilot with 3 certification bodies (8 countries)	NOW
Q2	Backend migration to Postgres + multi-tenant	NEXT
Q3	Mobile auditor app + offline-first sync	PLAN
Q4	AI auto-drafting reports + risk scoring	PLAN

Key Takeaways

One platform

Replace fragmented spreadsheets + email with a single workspace

Six roles, one truth

Strict separation of duties — no data crosses role boundaries

14-stage rigor

Every certification flows through documented gates

AI-amplified

Built-in assistant accelerates every role

Global-ready

Multi-country, multi-standard, multi-language out of the box

Read-only client portal

Auditees see their own data 24×7

Thank You
