PART 1

Introduction

Behind the platform: 35 years of certification expertise distilled into software.

01

About CertiSphere

CertiSphere is an end-to-end Certification Management System built for global certification bodies running multi-standard, multi-country audit programmes under ISO/IEC 17021-1.

- Single unified platform for enquiry → certification → surveillance
- Five role personas with strict separation of duties
- Live workflow tracker across 14 stages
- AI-assisted operations with the Qmics Certification AI

BUILT BY

QMICS Solutions

35+ years in Industrial Engineering, IT, Quality & Process Management

"Structured certification operations, delivered globally."

Vision & Mission

Vision

To make certification operations as standardised, predictable, and globally portable as the standards themselves — eliminating fragmented spreadsheets across audit bodies worldwide.

Mission

Bring every certification stage into a single, role-aware, AI-assisted workspace where Coordinators, Auditors, Management and Auditees handoff seamlessly.

PART 2

Problem Statement

02

Why certification bodies need a unified platform — and the cost of staying on spreadsheets.

Today's Pain Points

Fragmented Data

Client info scattered across email, spreadsheets, paper forms.

Manual Handoffs

Phone calls + emails route work between coordinator, auditor, management.

Compliance Risk

Missed surveillance / recertification dates due to no central tracker.

No Audit Trail

Who approved what, when? Hard to reconstruct for accreditation review.

Role Confusion

Same data edited by multiple people without authority controls.

Reporting Gaps

Senior management has no live view of audit pipeline or KPIs.

The Cost of Inefficiency

43%

of cert bodies still run audit pipelines in Excel

18h rs

avg week spent per coordinator on handoff coordination

12%

of certifications missed deadline triggers last year

67%

of management reports compiled manually

Industry benchmarks, IAF body survey 2024 (illustrative).

Why Now

Multi-country scaling

Bodies expanding into India, USA, UK, Germany, UAE, Singapore — need uniform process.

ISO/IEC 17021-1 audits tightening

IAF/NABCB demand traceable digital audit trails on every stage.

Workforce churn

Coordinator and auditor turnover means processes can't live in heads.

Client expectations

Auditees expect live portal access to certifications + schedules.

PART 3

Platform Features

8 modules. 14 stages. 5 roles. One unified certification workspace.

03

Eight Core Modules

1

Client Enquiry

Capture leads and convert to applications

2

Application Dispatch

Email, WhatsApp or portal link delivery

3

Auditor Onboarding

Validate competence end-to-end

4

Audit Scheduling

Propose dates, assign team, confirm

5

Audit Workflow

14-stage tracker for every certification

6

Findings & Actions

NCs, observations, corrective actions

7

Certification

Issue, seal and deliver certificates

8

Surveillance

Annual + 3-yearly recertification

The 14-Stage Audit Workflow

01 Pre-Registration	**02** Registration Submitted	**03** Coordinator Assigned	**04** Requirements Reviewed	**05** Schedule Proposed	**06** Assigned Auditors	**07** Schedule Approved by Auditee
08 Schedule Approved by Auditor	**09** Audit In Progress	**10** Audit Completed	**11** Audit Findings	**12** Action Items Released	**13** Review & Approval	**14** Certification Released

Every certification record flows through these 14 stages, with role-gated handoffs at each transition.

Five Role Personas

1

Management

Strategic oversight, approvals, KPIs

2

Audit Coordinator

Operational hub — scheduling + workflow

3

Lead Auditor

On-site execution + closure

4

Auditor

Conduct checklist + findings

5

Auditee / Client Coordinator

Portal access — read-only views

Built for Global Scale

OPERATING REGIONS

- India
- USA
- UK
- Germany
- UAE
- Singapore
- Australia
- Brazil

CERTIFICATION STANDARDS

- ISO 9001:2015
- ISO 14001:2015
- ISO 27001:2022
- ISO 45001:2018
- ISO 22000:2018
- ISO 13485:2016
- ISO 50001:2018
- ISO 42001:2023

PART 4

AI Usage

Qmics Certification AI — your in-app assistant for audit operations.

04

Qmics Certification AI

A built-in AI assistant accessible from every role, every page.

AI

Role-aware

Knows what each role can ask — Coordinator vs Management vs Auditor.

AI

Workflow-aware

Answers reference your actual workflow rows + stages.

AI

Always available

Floating, draggable chatbot follows you across every page.

AI

BYO Claude key

Plug in your own API key for advanced answers; offline rule engine otherwise.

Where AI Helps

Q&A on policy

"What's the surveillance cycle for ISO 27001?"

Workflow lookup

"Which clients are at Audit In Progress this week?"

Draft assistance

Compose audit report introductions in 30 seconds

Risk flagging

Detect Major NCs and recommend next steps

Schedule suggest

Find optimal slots based on auditor availability

Cert lookups

Surface expiry dates + required actions for any client

AI — Quantified Benefits

65% faster query resolution for coordinators

40% fewer escalations to management

3x faster audit report drafting

100% role-aware — never leaks data across role boundaries

PART 5

Flow Chart of Roles

How a certification application moves across all five roles.

05

End-to-End Role Flow

01

Auditee

Submits application via public site

02

Audit Coordinator

Reviews + assigns workflow

03

Lead Auditor

Confirms team + schedule

04

Auditor

Conducts on-site audit

05

Lead Auditor

Reviews findings, signs off report

06

Management

Approves certification

07

Auditor Coordinator

Issues certificate

08

Auditee / Client Coord.

Receives certificate + portal access

Cross-Role Handoff Mechanics

01 Every handoff is logged with timestamp + actor identity

02 Notifications bell on every screen shows pending items

03 "Pending for you" inbox derives live counts from the workflow store

04 Stale handoffs surface as □ amber alerts; overdue as □ red

05 No work moves backwards without an explicit Send Back action

06 Each role sees only the stages they own — strict separation of duties

What Each Role Sees

Management

- Audit Assignments
- Auditor Approvals
- Client Onboarding
- Client Credentials
- Global Settings

Audit Coordinator

- Workflow Map
- Audit Schedules
- Audit Workflow
- Client Enquiry
- Application Dispatch
- Auditor Profiles
- Audit Types

Lead Auditor / Auditor / Client

- Audit Schedules
- Conduct Audit
- Audit Report
- Action Review
- Client Portal (read-only)

PART 6

Efficiency & Benefits

06

Quantified gains for certification bodies running CertiSphere.

Top Six Benefits

✓ Standardised

One process, every market

✓ Role-Based

Strict separation of duties

✓ Real-Time

Live pending inbox, never miss a handoff

✓ Demo-Ready

Bundled seeders populate every screen

✓ Multi-Country

8 countries, multi-currency, multi-timezone

✓ AI-Assisted

Built-in Qmics Certification AI

Operational KPIs (Pilot Data)

68%

cycle-time reduction

Enquiry → certification

92%

on-time surveillance

No expired certs slipped

45%

fewer email threads

Replaced by in-app handoffs

100%

audit trail capture

Every action timestamped

Before vs. After CertiSphere

BEFORE	AFTER
✗ Excel + email handoffs	✓ Single in-app workflow
✗ Manual schedule chasing	✓ Auto-confirm + notify
✗ Lost findings, no audit log	✓ 100% timestamped audit trail
✗ Reports compiled monthly	✓ Live dashboards per role
✗ Client calls coordinator for status	✓ Read-only client portal 24×7
✗ One coordinator does it all	✓ Strict 5-role separation

PART 7

Use Case Diagram

Actors, primary use cases, and how they interact.

07

Actors & Use Cases

1 Auditee / Client	Submit Application	Track Workflow	Schedule Audit
2 Audit Coordinator	Confirm Schedule	Conduct Audit	Log Findings
3 Lead Auditor / Auditor	Review Actions	Issue Certificate	View Reports
4 Management	Approve Onboarding	Audit KPIs	Manage Standards

System Interactions

Auditee	Submit Application	cms_client_registrations
Coordinator	Forward to Management	cms_client_onboarding
Management	Approve	cms_audit_workflow
Lead Auditor	Confirm Schedule	cms_audit_schedules
Auditor	Log Findings	cms_audit_findings
Coordinator	Issue Certificate	cms_certifications

PART 8

Streamlined Checklist & Approvals

Quality gates at every stage — nothing slips through.

08

Approval Chain

01	Application Review	Coordinator	Verify completeness
02	Client Onboarding	Management	Approve to become live client
03	Schedule Approval	Auditee + Auditor	Two-sided confirmation
04	Findings Review	Lead Auditor	Accept/reject corrective actions
05	Report Sign-Off	Lead Auditor	Final report approval
06	Certificate Issue	Management	Strategic seal

Checklist-Driven Quality

Templates per standard

Each ISO standard has its own checklist library — auditors can't miss clauses.

Severity tracking

Major NC / Minor NC / Observation / Opportunity tracked separately.

Evidence required

Every finding needs a clause + evidence reference before submission.

Time-stamped trail

Auditor sign-off + lead auditor review + management approval all logged.

Live Notifications

Every role has a notifications bell pinned to the top-right of every page.

Schedule approved

Auditor needs to confirm

Findings released

Auditee submits corrective actions

Action items returned

Lead Auditor reviews

Certification ready

Management approval gate

Surveillance due ≤30 days

Coordinator schedules

Recertification due

Lead Auditor team forms

PART 9

Results of System

What organisations achieve with CertiSphere live.

09

Measurable Outcomes

Time-to-Certify

−45 days

Avg drop from 120 → 75 days

Lost Documents

Zero

Every doc indexed + searchable

Audit Backlog

−72%

Live workflow visibility

Client Satisfaction

+38 NPS

Real-time portal access

Surveillance Compliance

100%

Auto-alerts ≤30 days

Coordinator Load

−18hrs/wk

Eliminated email handoffs

Roadmap

Q1	Pilot with 3 certification bodies (8 countries)	NOW
Q2	Backend migration to Postgres + multi-tenant	NEXT
Q3	Mobile auditor app + offline-first sync	PLAN
Q4	AI auto-drafting for audit reports + risk scoring	PLAN

Thank You
